## Assignment 2: Massey News article

For this assignment you are asked to write a short article for Massey News. Your target audience is public stakeholders. The brief for this article is to discuss how partnership with Mātauranga Māori through the Massey Climate Action Plan can support emissions reduction at the University.

Select **one** of the following topic areas from the Massey Climate Action Plan to be the overall theme of your article:

- Buildings and Energy
- Transport
- Farms
- Waste

In your research to write this article, you will select at least one scientific journal article that covers credible information on the topic you are writing about. You will summarise and discuss how this science is relevant to your topic area.

To complete this assignment you will also need to consider and discuss how one or more of the key Mātauranga Māori concepts covered in Weeks 5 and 6 is relevant to the overall theme you have selected. Support your writing with citations to credible sources (these do not have to be scholarly peer reviewed sources).

You will write a short article of around 500 words that links the two elements outlined above (information on your topic and discussion of Mātauranga Māori). The article should introduce your topic and discussion to a general audience. At least one key technical detail related to the topic (e.g. from a scientific article and other sources found in your research) should be briefly summarised. There should be discussion of how one or more of the Mātauranga Māori concepts discussed in class are related to your topic. Finally, you should reflect on how the wider concept of sustainability is relevant in your topic area.

The article should be structured in a way to best convey information clearly to the target audience, using appropriate language to engage that audience. Summarised information should be appropriately substantiated using in-text citations and references formatted in APA7. Note that the reference section is not included in the word count.

## Assignment 2 components

Your 500 (+/- 50) word public newsletter article should include the following:

- an outline the topic of the Climate Action Plan you have chosen
- discussion of at least one piece of relevant scientific literature
- consideration of the connection to at least one key Mātauranga Māori concept
- reflection on how the wider concept of sustainability relates to the topic area
- appropriate citations and references
- sensible structure and logical flow of information
- appropriate language for a general audience
- Completed self review of your Assignment 2 using the grading rubric: this must be included in your submission
